Shyam Kumar

Software Engineer — Backend & Full-Stack Developer

+91-8953886302 kumarshyam03662@gmail.com Github linkedin.com/in/shyam-kumar-enigma007

Professional Summary

I'm a Software Engineer who works across the entire product lifecycle: translating requirements into working software, building reliable APIs, developing scalable architectures, and deploying systems that teams actually use in day-to-day operations.

Skills

Programming Languages: JavaScript, Python, C++, SQL, HTML5, CSS3, Object-Oriented Programming, Data Structures and Algorithms
Frameworks & Libraries: Node.js, React.js, Next.js, Express.js, FastAPI, Tailwind CSS, React Router
Backend & Web Technologies: RESTful APIs, API Development, Nginx, Server-Side Rendering (SSR), SEO
Databases: MySQL, Microsoft SQL Server (MSSQL), MongoDB
Developer Tools & Platforms: Git, GitHub, GitLab, Docker, Postman, VS Code, Jupyter, Microsoft SQL Server Management Studio, Excel, Google Analytics
Engineering Practices: Agile/Scrum, Clean Architecture, Code Review, Debugging, System Design, End-to-End Ownership, Cross-Functional Collaboration
Soft Skills: Problem-Solving, Analytical Thinking, Communication, Collaboration, Adaptability

Professional Experience

Full Stack Developer | Kaam Career Pvt Ltd — March 2026 – Present

- Contributed to **Kaabil Program**, a production job-seeker platform for women candidates developed as part of a **Mahindra K.C. Group and Gates Foundation** initiative powered by Mahindra Rise.
- Developed and maintained full-stack features using **Next.js** and **Node.js**, working across frontend interfaces, backend services, API integrations, and production application workflows.
- Enhanced the existing **job-matching algorithm** by improving matching logic, data handling, and backend workflows to deliver more relevant job recommendations based on candidate profiles and job requirements.
- Improved **SEO and search engine indexing** across the Next.js application by optimizing metadata, page structure, crawlability, and indexable content to strengthen organic discoverability.
- Enhanced the **Super Admin Panel and Recruiter Dashboard**, implementing new features and improving workflows for managing job postings, recruitment operations, candidates, and platform data.
- Maintained **GitLab CI/CD pipelines** and supported production deployments on **AWS**.
- Leveraged **AI-assisted development tools, including Claude Code**, for code generation, debugging, refactoring, and development workflows while reviewing and validating generated code before production use.

Software Engineer | Kolors India Pvt Ltd — Feb 2025 – Feb 2026

- Developed a **B2C order management system** for client customers, taking ownership of application features across frontend development, REST API development, business workflows, and production deployment.
- Built responsive customer-facing interfaces using **React.js** and initially developed **REST APIs using Node.js**, implementing backend workflows for order placement and customer operations.
- Migrated backend API development from **Node.js to FastAPI** to align with the existing mobile application services, which were already built using FastAPI, while maintaining consistent business logic across web and mobile platforms.
- Developed and integrated **FastAPI REST APIs** with the React.js frontend and implemented application workflows for order management, customer data, invoices, ledgers, and outstanding reports.
- Containerized backend services using **Docker** and deployed applications on **Linux-based production servers**, ensuring consistent environments across development and production.
- Improved system reliability and maintainability by structuring APIs with clean architecture principles and participating in code reviews and **Agile development** cycles.

Education

Indian Institute of Information Technology, Pune — 2020 – 2024

Bachelor of Technology in Computer Science Engineering
Relevant Coursework: Computer Programming, Object-Oriented Programming, Software Development Life Cycle (SDLC), Data Structures and Algorithms, Operating Systems, Database Management Systems

Achievements & Certifications

- Certified in **Python Programming: A Concise Introduction** (Wesleyan University, Coursera) and **Meta Professional Certificates** in **Front-End and Back-End Development**.
- Solved **300+ DSA and SQL problems** on LeetCode, strengthening problem-solving and analytical skills.
