

SHYAM KUMAR

SOFTWARE ENGINEER — BACKEND & FULL-STACK DEVELOPER

☎ +91-8953886302 ✉ kumarshyam03662@gmail.com 🐙 [Github](https://github.com/shyam-kumar-enigma007) 🔗 [linkedin.com/in/shyam-kumar-enigma007](https://www.linkedin.com/in/shyam-kumar-enigma007)

Professional Summary

I don't just write code, I ship things that work in production.

I'm a Software Engineer who works across the entire product lifecycle: translating requirements into working software, building reliable APIs, developing scalable architectures, and deploying systems that teams actually use in day-to-day operations.

Skills

Programming Languages: C++, Python, JavaScript, SQL, HTML5, CSS3, Object-Oriented Programming, Data Structures and Algorithms

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, React Router

Backend & Web Technologies: RESTful APIs, API Development, Nginx, Server-Side Rendering (SSR), SEO

Databases: MySQL, Microsoft SQL Server (MSSQL), MongoDB

Developer Tools & Platforms: Git, GitHub, GitLab, Docker, Postman, VS Code, Jupyter, Microsoft SQL Server Management Studio, Excel, Google Analytics

Engineering Practices: Agile/Scrum, Clean Architecture, Code Review, Debugging, System Design, End-to-End Ownership, Cross-Functional Collaboration

Soft Skills: Problem-Solving, Analytical Thinking, Communication, Collaboration, Adaptability

Professional Experience

Software Programmer | Kolors India Pvt Ltd

Feb 2025 – Present

- Took end-to-end ownership of a scalable web application for order placement, from system design to production deployment on company servers using **Dockerized infrastructure**.
- Built and deployed backend services using **FastAPI**, developing **RESTful APIs** and integrating them with a **React.js** frontend for reliable application workflows.
- Containerized backend applications using **Docker**, ensuring consistent environments across development and production, and deployed services on Linux-based company servers.
- Configured **Nginx** as a reverse proxy to route traffic efficiently between web and mobile services, improving performance and request handling.
- Designed and implemented modular features enabling customers to view and download invoices, orders, ledgers, and outstanding reports using a scalable application architecture.
- Improved system reliability and maintainability by structuring APIs with clean architecture principles and participating in code reviews and **Agile development** cycles.

Personal Projects

E-Commerce Application Development | React.js, Firebase, Tailwind CSS, Node.js, Express.js

Oct 2023

- Developed a high-performance e-commerce web application using **Vite and React.js**, implementing reusable components and responsive application workflows.
- Designed a **mobile-responsive** user interface using **Tailwind CSS**, improving usability across desktop and mobile devices.
- Implemented **client-side state management** and component-based architecture to maintain consistent data flow across the application.
- Integrated **Firebase Authentication and real-time database services** to securely manage user access and application data.
- Implemented seamless page navigation using **React Router** and developed a **QR-based digital payment** solution for easy and secure transactions.

Education

Indian Institute of Information Technology, Pune

2020 – 2024

Bachelor of Technology in Computer Science Engineering

Relevant Coursework: Computer Programming, Object-Oriented Programming, Software Development Life Cycle (SDLC), Data Structures and Algorithms, Operating Systems, Database Management Systems

Achievements & Certifications

- Certified in **Python Programming: A Concise Introduction** (Wesleyan University, Coursera) and **Meta Professional Certificates in Front-End and Back-End Development**.
- Solved **300+ DSA and SQL problems** on LeetCode, strengthening problem-solving and analytical skills.
